

# “Out in 3” - Emergency Evacuation Training

Every year in the UK hundreds of fires are recorded involving buses, coaches and minibuses. Efficient vehicle evacuation is essential - *particularly where vulnerable passengers such as children, elderly people and people with disabilities are carried.*

“Out in 3” is a highly participative CPC course for Bus, Coach and Minibus drivers that’s something different!

The course is a 50/50 split of theory and practical, combining information on efficient emergency evacuation of passenger vehicles, with an opportunity to put that theory into practice, via structured practical exercises using a smoke-machine.

The course, which was developed in partnership with *GoSkills*, has been accredited by *JAUPT*, and previous customers of “Out in 3” training include:

- Tangerine
- Bus Eireann
- WA Shearings
- Newport Transport
- Suffolk County Council
- Nottingham City Transport.

LCTS can deliver “Out in 3” directly to drivers or on a “Train-the-Trainer” basis.
